

Your music inside™

SpAudio Cast™

Enjoy Wireless Audio Technology

in the comfort of your Hot Spring®
spa and your home! The
SpAudioCast™ system delivers
premium sound quality and a cutting
edge entertainment experience.

How Does it Work?

The SpAudioCast system transmits sound wirelessly from virtually any audio source to your spa.

The wireless transmitter and receiver have been customized exclusively for your Hot Spring spa.

So, you can direct the system using the waterproof Hot Spring IQ 2020® spa remote control.

Portable Spas

SpAudioCast™

The Total Audio Experience- Hear *and* Feel the music

with the advanced components of the SpAudioCast music system.

- Powerful digital amplifier - enhances sound quality
- Two transducers - turn the spa shell into a speaker
- Two all-weather outdoor speakers – for entertaining in or out of your spa
- IQ 2020® remote control - directs iPod track and volume, spa jets, lighting, and more
- iCast™ transmitter and receiver - customized to wirelessly integrate sound into your Hot Spring spa

The amp, transducers, and receiver are installed out-of-sight, under the spa cabinet. There is no need for a docking station on the spa cabinet – so your Hot Spring spa maintains its sleek appearance.

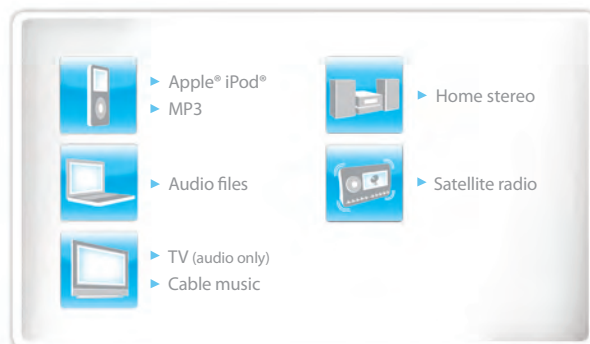

Your iPod and transmitter are positioned safely indoors - away from the elements, splashing water and wet hands.

Use the SpAudioCast system to play your iPod through your home audio system, even when your Hot Spring spa is not in use.

And, since the SpAudioCast system is an aftermarket feature, you can include it when you purchase your spa, or treat yourself later.

The SpAudioCast™ music system is compatible with

virtually any audio source:

SpAudioCast exclusively

for Hot Spring Spas

Your Hot Spring dealer can install the SpAudioCast music system on a Vista®, Grandee®, Envoy® or Vanguard® spa. You can also enjoy wireless audio on an Aria™ spa – ask your dealer for details.
